

# How-To Do Football Squares

You can charge any amount you would like. \$10 or \$20 is typical. \$10 per square gets you \$500 towards your fundraising. \$20 a square gets you \$1,000.

Winnings should be divided as follows: 10% first quarter, 10% second quarter, 10% third quarter and 20% final score. Example: You charge \$20 per square: \$200 1st/\$200/2nd/\$200 3rd and \$400 final score. \$1,000 towards your fundraising. never give more than 50% of your earning to the winnings,

To choose the numbers, you can record yourself picking numbers 0-9 and post it or record yourself doing an online random generator to sequence the numbers. This is super easy. But recording yourself and posting it is helpful when non family members buy in. So no one can say anything was "fixed".

Announce your winners after each quarter/final score. Congratulate them and thank them for donating. Do not forget to give them their winnings.
